ADVANCED SAFETY TECHNOLOGY

WINDSCREEN PROJECTED COLOUR ACTIVE DRIVING DISPLAY

The colour Active Driving Display projects essential driver information including speed, turn-by-turn navigation and traffic signs onto the windscreen, closer to the drivers field of vision meaning you can safely focus on the road ahead.

Colour Active Driving Display standard across the range.

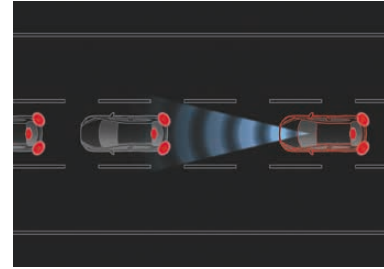

MAZDA RADAR CRUISE CONTROL (MRCC)

MRCC is an adaptive cruise control system. To activate, the driver sets a maximum speed (just as with cruise control) and size of the gap to maintain. The radar watches for traffic ahead and once the system senses a vehicle in front, the car will slow down and speed up automatically maintaining the drivers preset distance.

STOP & GO

Automatic models also have the additional feature of 'Stop & Go', meaning the vehicle will automatically accelerate and brake in start / stop traffic with minimal input from the driver.

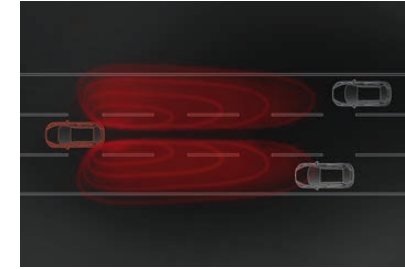

Mazda Radar Cruise Control standard across the range.

ADVANCED SMART CITY BRAKE SUPPORT (SCBS)

Designed to help avoid or minimise the effects of collisions at speeds up to approximately 50mph. The forward-facing camera and laser-based system continually monitors the gap and closing speed of the vehicle in front, and applies the brake if a collision is likely. The pedestrian Autonomous Emergency Braking (AEB) system monitors the surroundings and aids the driver if the system detects a potential collision involving pedestrians making city driving safer.

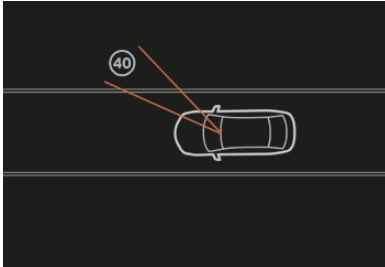

Advanced Smart City Brake Support standard across the range.

BLIND SPOT MONITORING (BSM)

Warns you of a vehicle entering a detection zone situated up to 50 metres behind, by activating a door-mirror mounted warning light on the relevant side of the vehicle. If you then indicate prior to turning in that direction, the warning light flashes and an audible alert sounds. Working at speeds as low as 20mph the system can prevent drivers from moving into the path of a following vehicle.

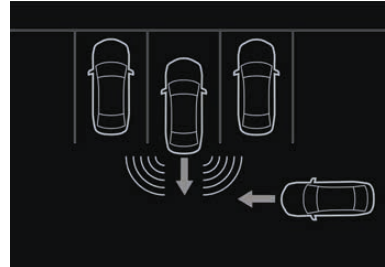

Blind Spot Monitoring standard across the range.

TRAFFIC SIGN RECOGNITION

Traffic signs and speed limits are displayed on the projected Active Driving Display. Information is retrieved from both the navigation system and front facing cameras which read road side signs, allowing you to stay informed at all times.

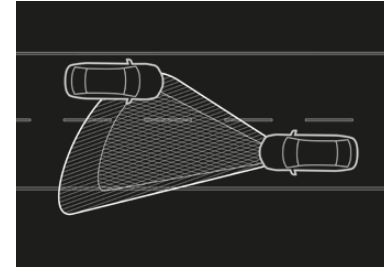

Traffic Sign Recognition standard across the range.

REAR CROSS TRAFFIC ALERT (RCTA)

Designed for when the vehicle is reversing, to prevent possible collisions with unseen vehicles. An alarm alerts you of any vehicles or obstacles approaching from either the side or the rear of the car, and silences once the area is clear.

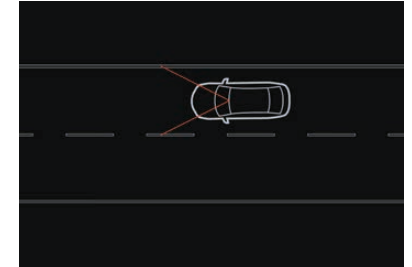

Rear Cross Traffic Alert standard across the range.

ADAPTIVE LED HEADLIGHTS (ALH)

Designed to work at night, the system automatically analyses vehicles ahead or those approaching in the opposite direction, and automatically switches between high and low beams by switching individual LED bulbs on and off as necessary. This makes it possible to drive with the high beam on at all times, significantly improving visibility when driving at night, without dazzling drivers of other vehicles.

Standard on GT Sport models.

LANE-KEEP ASSIST SYSTEM (LAS)

Lane-keep Assist System is designed to prevent your vehicle from inadvertently straying from its lane. A front view camera monitors the road ahead and calculates the cars position relative to the lane markings. If the system detects the vehicle is moving out of its lane unintentionally, the steering wheel will vibrate and an audible alert will sound. The system will also take corrective action to help you stay within the lanes through assisted steering.

Lane-keep Assist System is standard across the range.

¹⁾ Figures shown are for comparability purposes; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. All figures quoted are derived from the latest WLTP test cycle.

²⁾ Towing capacity is based on a 12% gradient and tested in accordance with 92/21/EEC as amended by 95/48/EC.

MAZDA SERVICES

MAZDA SERVICE PLANS

MODEL	ENGINE	PRICE
Mazda6	SKYACTIV-G	£679.00

Take the hassle out of servicing your car by opting for a Mazda Service Plan from your Mazda dealer. For a one off payment or manageable monthly sum, your annual Mazda servicing can be covered for up to 3 years. Contact your Mazda dealer for more information on the options available. At participating dealers only.

The maximum service interval for your Mazda is 12,500 miles or 12 months whichever occurs first, however, the servicing intervals may reduce based on the style of driving and the conditions under which your vehicle is operated.

Mazda Service Plans cover parts, labour & fluids at the prevailing VAT rate for the first three scheduled services. You have the choice of paying for your Mazda Service Plan with a one-off payment, or by monthly Direct Debit payments over the duration of the Plan. Please contact your Mazda Authorised Dealer for more information. The servicing for Mazda Service Plans can only be carried out at a Mazda Authorised Dealer. At participating Dealers only and plan must be activated prior to the vehicle's first service.
